STRATEGIC SOFTWARE QA LEADER

Hands-on QA leader with experience improving product quality, system stability, and delivery across web, mobile, and database platforms. Building AI-powered applications, managing setup, testing, debugging, and performance optimization. Skilled in manual and automated testing, SDLC, and Agile methodologies. Creates test strategies that reduce defects and improve performance. Delivers clear roadmaps and milestones to align teams and ensure on-time delivery. Builds collaborative, high-performing teams and drives continuous improvement and innovation.

End-to-End Testing |Test Plans | Regression Testing | UAT | Traceability Metrics | Roadmaps | Timelines | Agile | Scrum | Waterfall | Sprint Planning | Retrospective

TECHNICAL SKILLS

Applications: TestRail, Jira, Bugzilla, ProtonVPN, Tunnel Bear, Miro, Figma, G suites, Slack, DevTools, Selenium IDE, Katalon, Playwright, TestFlight, TestFairy, Braze Push Notification, AppsFlyer, Android Studio, Charles Proxy, Perforce, Gitlab, VS Code, Vercel, Shopify

Database: Supabase, SQL Server, SQL Data Compare, Databricks, pgAdmin 4

PROFESSIONAL EXPERIENCE

GLAM YOU UP, Remote 2025 – Present

Quality Assurance Manager

- Building an AI-powered SaaS app that transforms frontend web experiences into fully installable applications, managing store setup, app configuration, testing, debugging, and performance optimization.
- Collaborating closely with a growing startup team to refine features, resolve merchant issues, and deliver scalable solutions aligned with customer needs and business growth.

SOFTWARE QA PROFESSIONAL, Remote 2010 - Present

Clients: JigoCity, GraphPad Software, TradeMotion, Haven

- Support validation and enhancement of AI/ML platforms, improving functionality, user experience, and overall product performance in a fast-moving, early-stage environment.
- Specializing in the entire Software Development Life Cycle (SDLC), with expertise in developing detailed test plans, providing strategic feedback, and implementing smarter test strategies to achieve long-term, measurable results.
- Collaborate with Product Management to ensure alignment with customer needs, resulting in improved product features and higher customer satisfaction.
- Utilize SQL for data verification testing, ensuring data accuracy and reliability, which led to more informed decision-making and reduced errors.

APOLO P2P, Remote 2025 – Dec 2025

Quality Assurance Manager, Education Platform, **Part-time**

- Led the design and development of automated test scripts, streamlining regression testing and reducing manual QA effort by 30%.
- Managed and maintained QA environments using GitLab by merging code branches and deploying builds to QA, ensuring stable, test-ready releases and accelerating feedback cycles.
- Performed UI updates to resolve minor cosmetic issues and improved visual consistency, allowing the front-end engineering team to focus on more complex design and functionality resolutions.

ACTIVISION (MICROSOFT), Santa Monica, CA (Remote) 2022 - 2024

Studio Test Lead | Producer (Feature Dev), Call of Duty Warzone Mobile Game

- Developed and implemented strategic project/product roadmaps, timelines, milestones, and processes; identified and mitigated risks and challenges confirming clear visibility and communication across teams and stakeholders.

- Provided strategic feedback and actionable recommendations to improve usability and functionality.
- Led internal and external QA teams in validating web, Android, and iOS applications, maintaining high-quality standards across platforms.
- Managed the verification and validation of Warzone Mobile's Commerce features, Online Services, deep linking, and custom tools for Live Operators, assuring timely product delivery.
- Designed comprehensive test cases and streamlined QA processes and procedures, resulting in thorough test coverage and improved overall efficiency.
- Utilized TestRail, Jira, Test Flight, Test Fairy, Databricks, Braze Push Notification, and AppsFlyer for comprehensive testing and detailed reporting.
- Conducted tooling setups and backend testing using SQL Server/Databricks, Perforce, Python, Jenkins, JSON, HTML, and Game Variables Service configurations, enabling efficient backend database verification and quick issue identification.
- Built traceability metrics for stakeholders, enhancing visibility into QA progress and release readiness.

THERMO FISHER SCIENTIFIC (Previously Life Technologies), Carlsbad, CA 2007 - 2010

Software Quality Assurance Consultant, Biotechnology Research, Purchasing, and Custom Tools

- Designed and implemented quality plans for web applications, including Global e-Commerce, Supply Center, and B2B, significantly improving user experience and ensuring greater stability.

ETS, San Bernardino, CA 2006 - 2007

Software Quality Assurance Consultant, Educational Testing and Assessment Software

- Analyzed business requirements and actively participated in daily design meetings, providing insights on design improvements and test case development to enhance the QA cycle and ensure alignment with project goals.

THERMO FISHER SCIENTIFIC (Previously Life Technologies and Invitrogen), Carlsbad, CA 2005 - 2006

Software Quality Assurance Consultant, Biotechnology Research, Purchasing, and Custom Tools

- Delivered high-quality web applications (Global E-Commerce, Supply Center, and B2B), enhancing both user experience and team development, while utilizing QuickTest Pro to automate testing and improve test coverage and efficiency.

Additional Experience

iMETRIKUS, INC., Carlsbad, CA

Senior QA Engineer, MediCompass Software for Health Monitoring with Medical Device Integration

- Created and implemented Verification and Validation Plans to successfully validate medical web applications and hardware, ensuring full compliance with FDA regulations and ISO 9001 standards.

MITCHELL INTERNATIONAL, San Diego, CA

QA Supervisor, Medical Claims Management Software

- Managed QA team and defined test requirements, optimized SQL Server 2000 databases, deployed reporting applications, and automated medical data validation, ensuring complete accuracy and smooth operation.

TRANSCORE, San Diego, CA

Software Quality Assurance Engineer, Open Road Tolling and Traffic Management Systems

CAPITAL MANAGEMENT SCIENCES, Los Angeles, CA

Quality Control Analyst, Fixed Income Analytical Software

Education

Bachelor of Science (BS), Applied Mathematics, University of California at Los Angeles, Los Angeles, CA
